Draft token
Assist. token
Input tokens
Rule/Tree-Based CoSD verification
Autoregressive generation
Generation in parallel
$\mathcal{F}(P(draft), P(assistant)) \rightarrow \{0, 1\}$
$0 \rightarrow$ **Accept;** $1 \rightarrow$ **Reject**
Rule-Based CoSD: $\mathcal{F}(\cdot)$ are several pre-designed rules.
Tree-Based CoSD: $\mathcal{F}(\cdot)$ is a pre-trained decision tree.
CoSD Verification
Accept the draft token to the final output
Reject the draft token.
Replace it with the assistant token.
Regenerate all the following draft tokens.
